

Cross Participation – Business/Presence Opportunities

We are constantly in the market looking to alternate opportunities for your brand, service or product.

We find opportunity in works, projects and events that are tailored and designed with other goals in mind but with affinity targets that work for you! Working for your needs with minimal expending.

We find these opportunities through the year and negotiate/leverage with the “owners” of these projects so you can “Utilize” these opportunities to promote - include your service product with minimal impact to your budget and huge ROI's.
